CONSTRUCTION CREW
BUSY BEAUTIFYING GROUNDS

Aldridge’s senior construction class are proud of their latest project. As per usual they have done a professional job, this time in constructing an arbour at O-Block.

The outdoor structure has been completed as part of the student’s Certificate I Construction studies.

“The students are getting real world skills working on real life projects. In fact this project has required them to demonstrate skills that would usually be of a Certificate II or III standard,” said Construction teacher Damien Blyth.

School principal Mr Ross Higgins said, “We feel privileged to have our construction crew complete works around the school. Their projects not only demonstrate the fantastic skills that these students are gaining but also serve to enhance our grounds.”

Once spring arrives wisteria will be planted, so hopefully in the near future the arbour will be draped in beautiful purple blossoms.
