

Digital Mental Health

Digital Mental Health (e-mental health) is services, programs or applications, delivered via online, mobile or phone based platforms, that may be self-driven or involve real time or delayed interaction with a clinician or other support person.

Digital Mental Health services and programs allow Australians to access mental health information and support at any time and from any place.

DISCLAIMER:

The information provided throughout this guide is intended for information purposes only. Whilst many of the services and resources in this guide are government funded, health practitioners should independently investigate, evaluate and verify the content and credentials of any service or resource before choosing to use it or refer a user to it. The services and resources listed in this guide are not exhaustive and represent primarily Australian products.

eMHPrac is funded by the Australian Government
